USE OF TECHNOLOGY IN LEGAL EDUCATION - 2022-2023

| | |
|--------------------------------|---|
| TITLE OF ACTIVITY | USE OF TECHNOLOGY IN LEGAL EDUCATION - 2022-2023 |
| DATE | 03rd DECEMBER 2022 |
| NO OF PARTICIPANTS | 57 |
| DESCRIPTION OF ACTIVITY | <p>The legal profession has traditionally been characterized by its conservative and paper-intensive practices. However, in recent years, the adoption of technology has transformed the landscape of legal services, leading to improved efficiency, accessibility, and transparency in the justice system. This report delves into the use of technology at the Bombay High Court, specifically highlighting its relevance to the educational environment at Oriental Law College.</p> <p>Technology has made significant inroads into the legal sector, revolutionizing several aspects of legal practice. The Bombay High Court has embraced these advancements in various ways:</p> <p>Case Management Systems: The court employs robust case management software that facilitates the efficient handling of cases. This system allows lawyers and litigants to access case-related information online, reducing the need for physical court visits and paperwork.</p> <p>E-Filing and E-Service: The adoption of electronic filing (e-filing) and e-service of legal documents has streamlined the process of initiating, tracking, and managing cases. This has resulted in reduced delays and improved transparency.</p> <p>The incorporation of technology into legal practice, as demonstrated at the Bombay High Court, represents a significant step forward in modernizing the legal sector. Oriental Law College should continue to embrace technology to better prepare its students for the evolving demands of the legal profession. Collaborative efforts between educational institutions and the legal system can help bridge the digital divide and ensure that technology serves justice and education effectively.</p> |
